

The Temple of Celestial Harmony

Indeed, we are among you. We are Priests and Priestesses of Celestial Harmony.

You see, these cycles that you live on Earth, the solstices and the equinoxes, are always the beginning of a cycle and the end of a cycle.

In Telos, a part of these celebrations is done in the Temple of Celestial Harmony. And why is that?

As you listen to these words, focus on this Sacred Heart inside of you. Together we are entering the Temple of Celestial Harmony so that you can welcome the energies that are currently arriving on Earth, sacred Light energies to begin a new cycle.

Not only planet Earth is starting this new cycle, you are as well. At each beginning of season, at each equinox or solstice, you also prepare your Earth to receive energies. You prepare your mental body, your emotional body, your etheric body, your physical body, all your bodies to receive divine sacred energies.

So today, while you are being assisted, supported by the melodious sounds and the divine words of our sister Nancy, we will be in harmony together to welcome the energies of this equinox. Energies that are reserved for each of you, energies that you have programmed for each of you to take a big step, a new step towards yourself, towards the sacred of the sacred that you are.

Yes, this equinox affects the whole planet, all creation. All these energies are sacred, divine, conscious, alive and they come to you. Each of you will receive specific energies, unique for yourself.

During this sacred meditation, be conscious that you are the sacred cup that receives the energies that come to you to allow your resurrection, the amplification of what you have been in reality for all eternity, this eternal consciousness, this Eternal love, the amplification of Love in action that you are in this dimension.

I spoke on behalf of the Priests and Priestesses of the Temple of Eternal Harmony and we will be with you all this afternoon to anchor in you the energies that opens the heart to yourself, to life and to the consciousness that you are, and that is growing in that density.

Thank you!
