

**Message from Sananda received during a trip to Bosnia.**

Transmitted by Denise Laberge

I am Sananda, Prince of this World.

I have accompanied you throughout this journey to infuse into your hearts my energy of Love and to support your awakening. You have received energies, teachings, tools. All this with one goal in mind: to assist you in discovering the richness of your own Life! Until now you have lived your Life, the one with which you are familiar and that has been imposed on you for thousands of lives.

Now the seeds are ripe and ready to take roots, to grow. Please open the door of your Heart to welcome this truth. Lightworkers have worked hard for thousands of years and you are these Lightworkers.

I ask you to take a new look at your life. A look of accomplishment, success and appreciation. This is important despite all the pain, the suffering and the burden of daily life in this unrestrained acceleration. Despite all this, try and accept to express the intention to consider *your current life as a success, and I am weighing my words.*

Know that your life is a success, a real success. The way you look at yourself and your life, is it important? YES!

By agreeing to change your vision of yourself, you tell Life that you are ready and that you believe deeply and truly in the power of Life in you. Your engagement in this decision and this change in attitude is required because it is this movement, this new committed vision that will trigger the shift of energies into action in your life right now, the shift to your true Life frequency.

All is ready. Life is ready to express itself through you and is ready to grow in you.

This new way of looking at yourself creates. It is this new vision that will rebuild you - towards the Almighty. Understand these words! Understand their depth!

Children of my Love, of my life in action, you are invited to discover the Life force that you have come to manifest in this world "YOUR WAY".

The Great Life One has prepared each of you so that it can manifest itself through you in a unique way. Each of you carries a special Light!

Your Life belongs to you. Recognize it and make it shine!

I am Sananda your brother.
